

## ReVox B77 MKII extended... - the machine -

## ReVox B77 MKII extended – history...

Many music lovers know the ReVox B77 tape machines. Manufactured from 1977 and still listed on the ReVox price list in 1988.

Today, many of these wonderful tape machines are kept in the attic or basement.

I love to bring these tape machines back to life and also to redesign the original gray design in many new colors and new designs.

Started with the replica of the lower front panel which I still offer today as a new production in the color black.

The ReVox B77 MKII extended is now available as standard in the colors black, red, dark green and acid green but also on request in almost any other color.

A complete B77 MKII conversion kit with over 30 new parts for the ReVox B77 MKII owner is of course also available.
